## Philosophy of Services

**Recovery is a Reality. It can, will and does happen.**

- Services are delivered under a Recovery Oriented System of Care Model (ROSC)
- This model recognizes that recovery from drugs and alcohol is a process of change through which an individual achieves abstinence and improved health, wellness and quality of life.
- ROSC places a greater emphasis on continuity of care: effective prevention at all ages, outreach and engagement, treatment and ongoing support.
- We can meet you where you are at on your recovery journey or help to get you started on it. ROSC strives to effectively link people with the right services at the right time.
- The lives and experiences of other people in recovery are valued and used to help others on the journey.
- ROSC also recognizes that a healthy community requires its members to be healthy. Communities can support long term change for those with addictive disorders and their families by recognizing the disease of addiction and combating stigma around it.

## Philosophy

*"Quality and Excellence through Partnerships"*
