**I. Purpose**

Southwest Michigan Behavioral Health Services (SWMBH), Prepaid Inpatient Health Plan (PIHP) aligns its efforts with Michigan Department of Health and Human Services (MDHHS),

*"It is the policy of Michigan Department of Health and Human Services (MDHHS) that services and supports provided to individuals with mental illness including co-occurring conditions are based in recovery."*

Furthermore, SWMBH supports that system transformation toward integrated care for all individuals served by participant Community Mental Health Service Providers (CMHSP) and Substance Use Disorder Providers is based on the principles of recovery. Recovery-based services require self-direction by the individual, who defines his or her own life goals and designs a unique path toward those goals. Active outreach to inform our communities about the prevalence of trauma and to encourage a culture of safety will aid individuals in their recovery.

**II. Policy**

It is the policy of SWMBH that all services and supports for individuals and their families shall be provided within the context of a true partnership that instills hope and a belief that individuals can recover. It is essential SWMBH employees and providers offer integrated treatment practices supported by research and selected by the individual and the treatment provider(s) according to a person centered planning process and medical necessity criteria. SWMBH, the CMHSPs and Provider Agencies assist each customer by providing medically necessary services and supports to help approach each day's challenges, overcome disabilities, acquire skills, live in community, and contribute to society in meaningful ways.

**III. Standards and Guidelines**

- A. Recovery from mental disorders and substance use disorders as defined by Substance Abuse and Mental Health Services Administration (SAMHSA) is: A process of change through which individuals improve their health and wellness, live a self-directed life, and strive to reach their full potential.
- B. SAMHSA also has delineated four major dimensions that support a life in recovery:
  - 1. Health: Overcoming or managing one's disease(s) as well as living in a physically and emotionally healthy way.
  - 2. Home: A stable and safe place to live.
  - 3. Purpose: Meaningful daily activities, such as a job, school, volunteerism, family caretaking, or creative endeavors, and the independence, income, and resources to participate in society.
  - 4. Community: Relationships and social networks that provide support, friendship, love, and hope.
- C. Self Determination maintains the philosophy that recovery for individuals with developmental disabilities is best understood in terms of the right to live a self-determined life not defined by the restraints of one's disabilities.
- D. The following Guiding Principles of Recovery will inform local policy makers, providers, funders, peers/customers, and others as we design, measure, and reimburse for integrated and holistic services and supports to effectively meet the individualized needs of those served:
  - 1. Recovery emerges from hope
  - 2. Recovery is person-driven
  - 3. Recovery occurs via many pathways
  - 4. Recovery is holistic
  - 5. Recovery is supported by peers and allies
  - 6. Recovery is supported through relationship and social networks
  - 7. Recovery is culturally-based and influenced
  - 8. Recovery is supported by addressing trauma
  - 9. Recovery involved individual, family, and community strengths and responsibility
  - 10. Recovery is based on respect

**IV. Definitions**

- A. Recovery: A process of change through which individuals improve their health and wellness, live a self-directed life, and strive to reach their full potential
- B. Relapse: The process of returning to patterned thoughts and behaviors, and/or active substance use after a period of stability. Relapse is considered to be part of the recovery process and a component of a chronic disease, and should be viewed as an opportunity for learning.
- C. Freedom: The ability for individuals, with assistance from significant others (e.g., chosen family and/or friends), to plan a life based on acquiring necessary supports in desirable ways, rather than purchasing a program. This includes the freedom to choose where and with whom one lives, who and how to connect to in one's community, the opportunity to contribute in one's own ways, and the development of a personal lifestyle.
